8a1. EWM treatment was done on Monday. Originally 119 acres identified, then the state shut down, then vacations..., last week we finally got our grant from the DNR. Our vegetation survey was not done, so we only could treat 41.6 acres . We're not spending all of the grant money, so we'll roll over the rest for next year. Mark for that purpose. Would have used all and more but we were unable to.

8a2. The Lake Vegetation Management Plan (LVMP) will be in place for next year and will allow for treating more. Vegetation survey status: we were expecting DNR to do, the state shutdown ended that. Now Steve McComas will

do within the next few weeks. One good survey will suffice, and we'll write plan over winter.

St Germain – how do we handle areas that were treated?

Parenteau – the treatment area was 95% or more EWM so for purpose of survey we know what was there. Survey will cost \$3750 out of EWM account. Survey will be done within 2 weeks and will look at entire lake and all plants within.

***MOTION # 2 (Parenteau/Michaud) Move to approve \$3750 for point intercept lake survey done by Blue Water Science. All aye, passed.***
